

Baystate Organic Certifiers

Prohibited Methods Affidavit

NOP Rule 205.105 requires that certified products and their ingredients be produced without the use of ionizing radiation, GMO technology (cell fusion, micro/macro encapsulation and recombinant DNA technology), and in the case of agricultural ingredients, sewage sludge. Even if an ingredient is not itself certified organic, it must comply with 205.105 to be eligible for use in a certified product.

Purpose: This affidavit may be submitted by producer/manufacturers of non-organic ingredients to show compliance with NOP 205.105. **The affidavit must originate from the original producer/manufacturer, not a distributor.**

I, (Name of authorized representative of ingredient producer/manufacturer)

_____, attest that the following ingredient(s) provided to
(name of Baystate applicant) _____, was to the best of my
knowledge produced without the use of the following (check all that are applicable):

- GMO technology;
- ionizing radiation;
- sewage sludge (applies to agricultural ingredients only).

List of ingredients/products:

Authorized supplier representative must initial next to each one:

_____	_____
